

COVID-19 PREVENTION & SAFETY IS OUR TOP PRIORITY

- There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19).
- **The best way to prevent illness is to avoid being exposed to this virus.**
- The virus is thought to spread mainly from person-to-person.
 - » Between people who are in close contact with one another (within about 6 feet).
 - » Through respiratory droplets produced when an infected person coughs, sneezes or talks.
 - » These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.
 - » Some recent studies have suggested that COVID-19 may be spread by people who are not showing symptoms.

PLEASE FOLLOW THESE GUIDELINES UPON ENTERING THIS PREMISES:

- **Refrain from entering if you have been exposed to COVID-19 in the past 14 days**

- **Complete COVID-19 Questionnaire**
